## Summary

A dedicated and detail-oriented Network Support Engineer with hands-on experience in network configuration, system maintenance, and security implementation. Strong understanding of networking concepts, troubleshooting methodologies, and performance optimization. Seeking an opportunity to contribute technical expertise to a growing organization while continuously enhancing professional skills.

## Skills

- Cisco Routers & Switches (Configuration & Maintenance)
- Firewalls (Cisco ASA, Fortinet)
- VPN Technologies (IPsec, SSL)
- TCP/IP, DNS, DHCP
- Network Security Basics (Firewall Rules, Access Control)
- Wireless Networking (802.11 a/b/g/n/ac)
- LAN & WAN Setup
- Routing Protocols (OSPF, RIP)
- Switching Concepts (VLANs, STP)
- Network Monitoring & Diagnostics Tools

## Experience

**TechWave Solutions Pvt. Ltd.** | Network Engineer | 2018 – Present

- Installed, configured, and supported LAN and WAN networks for multiple departments, serving over 120 users.
- Diagnosed and resolved network connectivity issues, reducing system downtime and improving productivity.
- Configured firewall policies and access rules to enhance network security.
- Set up and maintained VPN connections for remote employees and branch offices.
- Monitored network performance and identified potential risks and bottlenecks.
- Assisted in network expansion projects and hardware upgrades.
- Maintained documentation for network configurations and troubleshooting procedures.

## Education

Shivaji Polytechnic College | Diploma in Computer Engineering | 2018

Relevant coursework included: Computer Networks, Operating Systems, Database Management Systems, Network Security.

## Projects

- Enterprise Network Setup: Assisted in designing and deploying a secure LAN infrastructure for a mid-sized office environment.
- Remote Access VPN Deployment: Implemented VPN access for employees working from remote locations, ensuring secure communication with internal systems.
